WORK EXPERIENCES

Full Stack Engineer
01/2026 – Present
Legal Plus 🔗
Bandung, West Java, Indonesia
- Translated complex Figma designs into production-ready web interfaces with high visual accuracy, responsiveness, and accessibility standards.
- Worked closely with designers to resolve design-to-code gaps, clarifying edge cases, responsive behavior, and interaction details before implementation.
- Improved existing frontend code by refactoring tightly coupled components into cleaner, more scalable structures, increasing readability and long-term maintainability.

Full Stack Developer
03/2025 – 01/2026
Playfields
Sleman, Yogyakarta, Indonesia (Remote)
- Architected and built multi-tenant SaaS platform from scratch enabling sports venue owners to manage bookings, serving data with real-time reservation system.
- Integrated Xendit payment gateway processing transactions monthly with secure payment handling, automated reminder, and reconciliation features reducing manual payment tracking by 90%.
- Created a responsive admin dashboard using Tailwind CSS that integrates venue analytics, revenue reports, booking workflows, and customer insights, improving clarity and decision-making for operational teams.
- Collaborated with cross-functional teams in agile environment, consistently delivering sprint commitments with on-time delivery.

Full Stack Developer
06/2023 – 03/2025
Business Watch Indonesia
Boyolali, Central Java, Indonesia
- Maintained and enhanced a legacy Android application built with Kotlin, driving over 15.000+ downloads on the Google Play Store through continuous performance and UI/UX improvements.
- Architected freemium subscription model with premium recruiter dashboard featuring candidate filtering, and analytics tools generating recurring revenue stream.
- Integrated Mailchimp email marketing automation launching targeted newsletter campaigns that increased weekly active users by 28% and improved user retention by 35%.
- Managed complete product lifecycle from requirement gathering, technical architecture design, development, testing, Play Store deployment, to post-launch feature iterations.
- Collaborated with cross-functional teams in agile environment, delivering 15+ major features across both platforms with on-time delivery and stakeholder satisfaction.

HIGHLIGHTED PROJECTS

Legal Plus 🔗
01/2026 – Present
Legal Plus is a cloud-based legal practice management software specifically designed to help Indonesian law firms work more efficiently and professionally.

Playfields 🔗
03/2025 – Present
Playfields is a SaaS platform designed for booking management of futsal and mini soccer fields. It provides real-time availability, online booking, and payment processing features. The system also offers management tools for field owners to control pricing, scheduling, and transaction reporting, delivering a seamless and efficient user experience.

Kubu.id 🔗
06/2023 – 03/2025
Kubu.id is a community-based mobile application for job seekers and professionals, offering job listings, online consultations, and information sharing. It supports real-time notifications and provides a secure backend infrastructure for managing users and content.

EDUCATION

Bachelor of Science in Informatics
01/2019 – 06/2023
University of Amikom Yogyakarta
Sleman, Yogyakarta, Indonesia
3.78 GPA
