SUMMARY

Software Engineer with 3 years of experience building production SaaS products end-to-end. Shipped real systems with transactional complexity including payment integrations, role based access control, and multi-tenant architecture across React, Tanstack Start, Next.js, Node.js, Go, and Laravel. Comfortable owning features from database to UI, and working autonomously in remote, fast moving teams.

SKILLS

Front End: HTML5, CSS3, JavaScript, TypeScript, React.js, Tanstack Start, Next.js, Vite, Tailwind CSS, Material UI, React Query, Zustand

Back End: Laravel, Go, Node.js, Supabase, Firebase, RESTful API, Payment Service, Webhooks, Microservices Architecture

Database: PostgreSQL, MySQL

Version Control & Deployment: Git, GitHub, Cloud Deployment, Azure

Development Practices & Tools: Agile/Scrum, Code Review, Performance Optimization, AI-Assisted Development

WORK EXPERIENCES

Software Engineer 04/2026 – Present | Selangor, Malaysia (Remote)
Alpha Red Solutions

- Migrated a ticketing platform from Vue.js to React and TanStack Start as the sole frontend engineer, rebuilding 5 revenue critical customer journeys and integrating availability, reservation, booking, and payment APIs.
- Reduced booking and checkout failures by 20% by resolving session expiry, inventory state, and payment recovery defects.
- Digitized employee-management workflows through automated validation and role-based access controls, supporting 50+ internal users and reducing data-entry errors by 30%.
- Coordinated asynchronous development and Azure CI/CD releases with remote APAC teams, supporting delivery across 2 core platforms.

Full Stack Engineer 01/2026 – 04/2026 | Bandung, Indonesia
Legal Plus

- Implemented subscription and purchasing workflows, delivering 4 end-to-end payment flows for package renewals, upgrades, additional storage, and additional accounts.
- Architected granular role based permissions, enabling role specific CRUD controls across 60+ page and panel access points.
- Delivered 15+ production ready SaaS pages and components, integrating backend APIs, subscription payments, and granular permissions into complete user workflows.
- Resolved critical frontend defects under tight deadlines, restoring affected workflows and maintaining service continuity for paying clients.

Full Stack Developer 03/2025 – 01/2026 | Sleman, Indonesia (Remote)
Playfields

- Architected and built multi-tenant SaaS platform from scratch, integrating real-time reservations, automated payments, and operational reporting.
- Integrated Xendit payment gateway with end-to-end transaction handling covering payment capture, automated reminders, and reconciliation, reducing manual payment tracking by 90% and enabling the platform to go live without a dedicated finance workflow.
- Developed a responsive Tailwind CSS dashboard that integrates venue analytics, revenue reports, booking workflows, and customer insights, improving clarity and decision making for operational teams.
- Collaborated with cross-functional teams in agile environment, consistently delivering sprint commitments with on time delivery.

Full Stack Developer 06/2023 – 03/2025 | Boyolali, Indonesia
Business Watch Indonesia

- Maintained and enhanced a Kotlin Android application through performance and UI/UX improvements, supporting an app with 15,000+ Google Play downloads.
- Built a freemium subscription model with candidate filtering and recruiter analytics, establishing the platform's primary recurring revenue stream.
- Automated targeted newsletter campaigns through Mailchimp, increasing weekly active users by 28% and improving user retention by 35%.
- Managed requirements, architecture, development, QA, and post launch iteration without a dedicated product manager or technical lead, delivering and maintaining 2 platforms.

EDUCATION

Bachelor of Science in Informatics 01/2019 – 07/2023 | Sleman, Indonesia
Amikom University Yogyakarta
3.78 GPA
